

Issue: PC unable to connect with the map drive

Method 1

1) Add the windows credentials in Credential Manager

2) Unmapped the driver if existed

3) Create the mapdrive manually in Computer

← Map Network Drive

What network folder would you like to map?

Specify the drive letter for the connection and the folder that you want to connect to:

Drive: ▼

Folder: ▼

Example: \\server\share

☒ Reconnect at sign-in

☐ Connect using different credentials

[Connect to a Web site that you can use to store your documents and pictures.](#)

4) Restart the PC

5) The PC able to map drive without ask the credentials permissions

Method 2

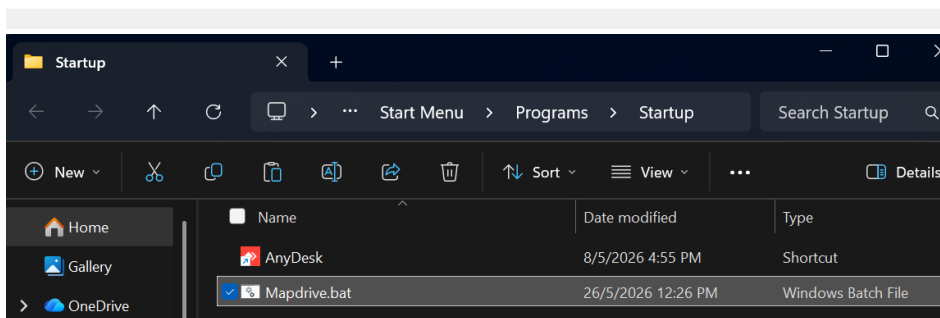

- 1) Create one mapdrive batch script
- 2) Put the mapdrive script in shell:common startup or shell:startup
- 3) Untick “ask without any permission”
- 4) Restart the PC
- 5) The PC able to mapdrive without ask credential permission

Type the name of a program, folder, document, or Internet resource, and Windows will open it for you.

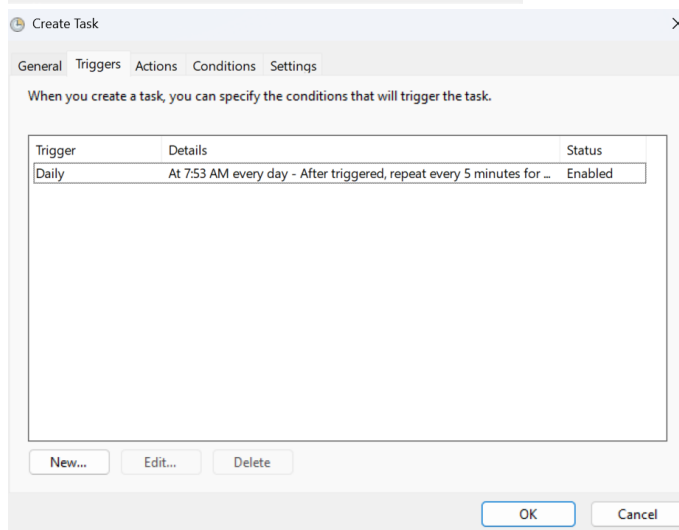

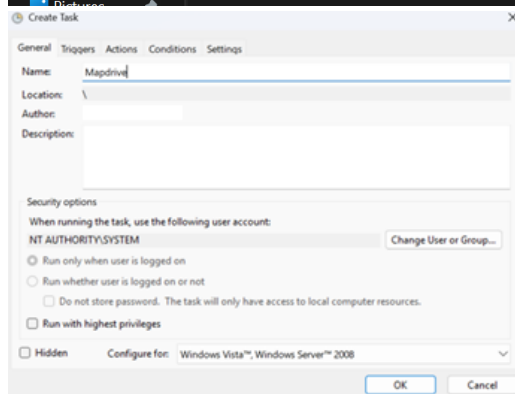

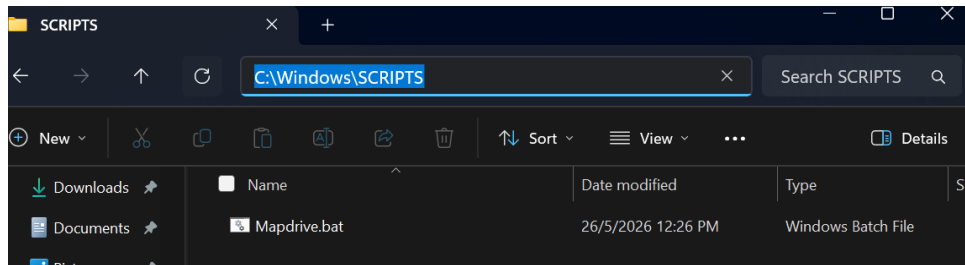

Open:

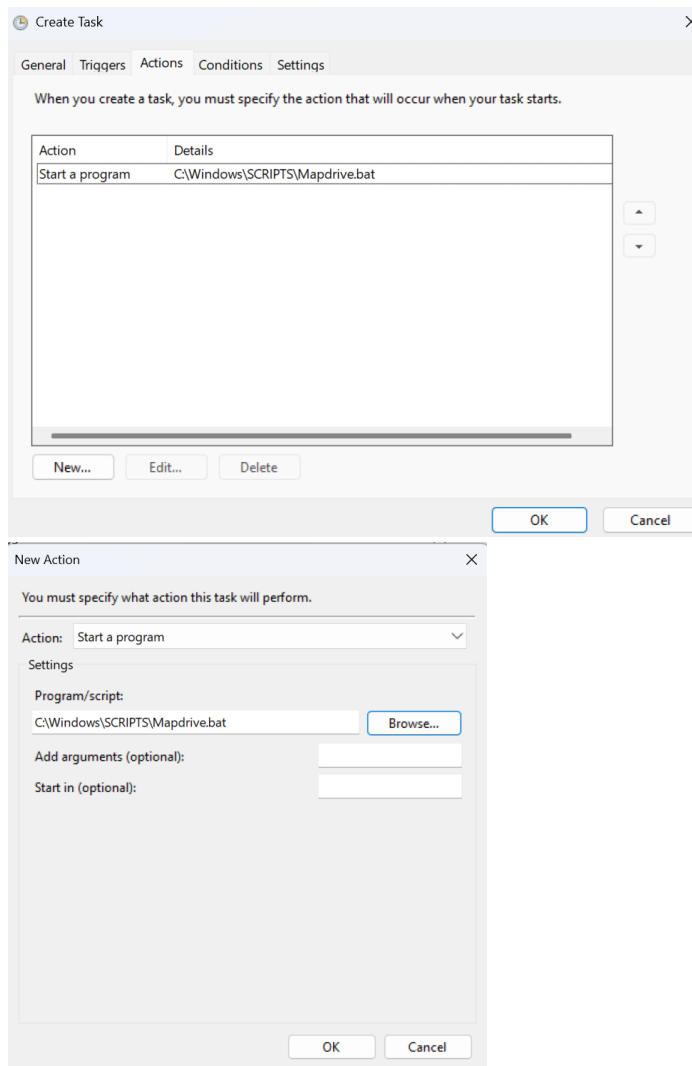

shell:common startup

Method 3

- 1) Create one folder name as SCRIPTS
- 2) Paste the mapdrive script in local C:\Windows\SCRIPTS
- 3) Create one task in task scheduler

- 4) Mapdrive manually in computer
- 5) Restart the PC
- 6) The PC able to map drive without ask the credentials permissions
