

Issue: Unidentified network

Method 1

- 1) Physical reboot the switch
- 2) Re-plug the LAN cable into the switch port or change into a new port
 - ✚ The LAN cable broken might be a problem
 - ✚ Restart the switch to make sure all network refresh
 - ✚ Make sure all network are connected

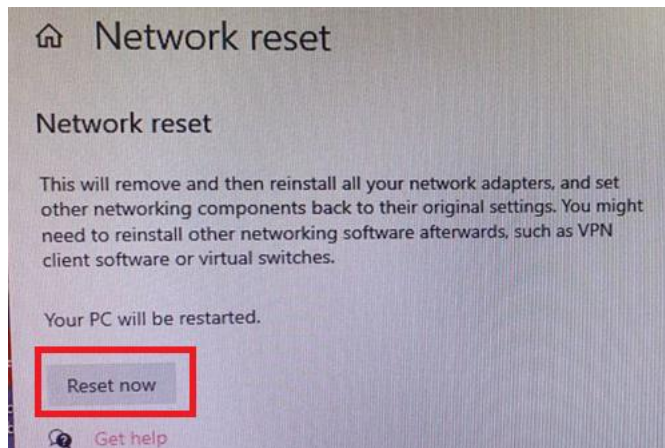

Method 2

1) Open CMD as administrator run these commands

- netsh winsock reset
- netsh int ip reset
- netsh advfirewall reset
- ipconfig /flushdns
- Restart the computer

2) If the problem persists, follow this path

- Settings → Network and Internet → Status
- Click on “Network reset”

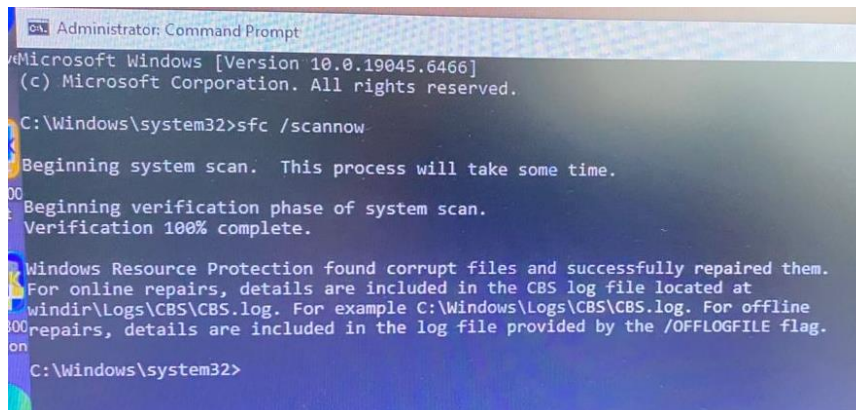

Method 3

- 1) Turn off/on the firewall

✚ The connection might be block by firewall

- 2) Open CMD as administrator run this command

✚ `sfc /scannow`

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.19045.6466]
(c) Microsoft Corporation. All rights reserved.

C:\Windows\system32>sfc /scannow

Beginning system scan. This process will take some time.

Beginning verification phase of system scan.
Verification 100% complete.

Windows Resource Protection found corrupt files and successfully repaired them.
For online repairs, details are included in the CBS log file located at
windir\Logs\CBS\CBS.log. For example C:\Windows\Logs\CBS\CBS.log. For offline
repairs, details are included in the log file provided by the /OFFLOGFILE flag.

C:\Windows\system32>
```

✚ Restart the PC

Feel free to try all this method above
