

How to connect the zebra printer into the PC (ZDesigner ZT410-203dpi ZPL)

- 1) Add printers in printers and scanner
- 2) The path: Control Panel → Views Devices and Printers → Add a printer and Scanner → Add Device

- 3) Click on Add a new device manually

- 4) In my case, there has one Admin PC connected to the zebra printer. Click on "Select a share printer by name" It will display the PC network.
- 5) Select the PC network and the Printer that need to be install in this PC

← Add Printer

Find a printer by other options

☐ My printer is a little older. Help me find it.

☒ Select a shared printer by name

Browse...

Example: \\computername\printername or
http://computername/printers/printername/.printer

☐ Add a printer using an IP address or hostname

☐ Add a Bluetooth, wireless or network discoverable printer

☐ Add a local printer or network printer with manual settings

- 6) If the connection is failed. Install the driver if does not exist.
- 7) The printer device will be display in "Add a printer and Scanner"
- 8) Remove that printer because It does not connect properly with the printer by network
- 9) Retry again to Add Printer (Follow steps 3 until 5)
- 10) Test print
